APPLICATION FOR SURVEY.

Application No. 23

TO George F. Horton, County Surveyor of Harris County, Texas:

By virtue of Section Eight of An Act approved April 15, 1905, I hereby apply for a survey of the following described unsurveyed land appropriated to the Public Free School Fund under Chapter 11, Act. Feb. 23, 1900, to-wit:

Situated in Harris county, Texas, about fourteen miles S. 38° E. of the City of Houston, and bounded on the South by H.T. & B. Sect. No.1, Cert. 5/165: Bounded on the East by a line produced due North from the North East corner of Hemminway survey, abstract No. 801; and bounded on the north by the south line of H.T. & B. RR. Co., Sect. No.4, Cert. 5/166 and bounded on the west by the East line of the Walton, Hill & Walton Survey.

I solemnly swear that I desire said land surveyed with the intention of buying it, and that I am not acting in collusion with, or attempting to acquire said land for another person or corporation.

Jan. H. Burt
Applicant.

P.O. Houston, Texas.

Subscribed and sworn to before me this 23rd day of April, 1907.

W. J. Hunt
Notary public in and for

Hon. J. J. Terrell,
Commissioner General Land Office,
Austin, Texas.

Dear Sir:-

Referring to application of Dr. James House Bute of Houston, Texas, which is of record in my office under No. 23 in Book 6 Page 72, I beg to report the following results, which were obtained by an actual Survey in the field.

First I tied on to the S. E. Corner of the Wm. M. Cook abandoned Survey and then located the S. W. Corner of the Jno. Dominer assee, of Chas L. Clark which Survey is also abandoned, and of which two Surveys I hereby beg to hand you certified copies of the original Field Notes.

By these two Surveys I located the common line of Section 7 & 8 of the W.Co.R.R.Co.Survey, Cert. No. 158, in so doing I secured the calls to natural objects called for in the field Notes of these two Sections.

From this line I established the South line of Section No. 4 of the H.T.&B.R.R.Co. Survey Cert. 5/166 being the North line of the land in question.

The South line of said land in question being common with the North line of H.T.&B.R.R.Co.Survey No. 1 Cert. No. 5/165 as patented by a survey made about 1893.

For the better identification of the foregoing I hereby refer to the accompanying Map, all measurements shown on same were made in the field.

But on the other hand I wish to point out, that a previous Survey of the Day Land and Cattle Company land made by my office, conflicts with the accompanying map in such a way, that I wish to leave the decision of this matter with the General Land Office, and the opinion of the different Surveyors in this locality conflict as to the location of these lines.

I am,

Very respectfully,

Geo F. Horton
County Surveyor,
Harris County.

HOUSTON, TEXAS

Hon. J. L. Terrell,

Commissioner of the General Land Office,

Dear Sir:-

Referring to application of Dr. James House State of Houston, Texas, which is of record in my office under No. 23 in Book 6 Page 72, I beg to report the following results, which were obtained by an actual survey in the field. First I tied on to the S. E. Corner of the W. M. Cook abandoned survey and then located the S. W. Corner of the two Dominant acres, of Chas. E. Clark which survey is also abandoned, and of which two surveys I hereby beg to hand you certified copies of the original field notes.

By these two surveys I located the common line of Section 7 & 8 of the W. Co. S. R. Co. Survey, Cert. No. 158, in so doing I secured the calls to natural objects called for in the field notes of these two Sections.

From this line I established the South line of Section No. 4 of the H. T. & R. Co. Survey Cert. 5182 being the North line of the land in question.

The South line of said land in question being common with the North line of H. T. & R. Co. Survey No. 1 Cert. No. 5182 as patented by a survey made about 1893.

For the better identification of the foregoing I hereby refer to the accompanying map, all measurements shown on same were made in the field. But on the other hand I wish to point out, that a previous survey of the Bay Land and Gattie Company land made by my office, conflicts with the accompanying map in such a way, that I was obliged to leave a question as to the location of these lines.

I am,

Very respectfully,

County Engineer,
Harris County.

Hon. Jno. J. Terrell,

Commissioner General Land Office,

Austin, Texas.

Dear Sir:-

In compliance with your favor of July 24, answer to which has been delayed, on account of the absence of the County Surveyor, we beg to enclose you herewith, the following papers, relative to the Land File of Dr. Jas. House Bute, towit:

1. Original Application, No. 23.
2. Field notes of survey made under said application, together with certificate and affidavit of ~~redemption~~, by the County Surveyor, showing same to have been filed in your office, on July 19th.
3. Letter of County Surveyor, addressed to you, dated June 24th.
4. Certified copies of field notes of the following surveys:
 - John Gay
 - H. T. & B. Certificate, No. 5/165.
 - W. M. Cook, Assignee of Henry H. Russell.
 - Chas. L. Clark, Assignee of Jno. Dominer.
5. Map showing the Jas. House Bute file, prepared by County Surveyor.
6. Blue-print of map prepared by County Surveyor, covering Sections 7 and 8, W. C. R. R., Block 7, (This is requested to be sent, by the County Surveyor).
7. A statement prepared by Mr. A. E. Stimpson, a well known local Surveyor, which presents our construction of the territory under consideration.

We will not add anything to the enclosures at this time, but will ask you, that after your office has gone into the matter, should you desire further information or data, with reference thereto, or if anything should not be plain, we would be very pleased

Jno. J. T.-2

for you to call upon us, and we will make it a point, to either write you fully, or come to Austin, to explain it.

With kind personal regards, we beg to remain,

Very truly yours,

Hunt, Myer & Townes.

Per Henry.

[Signature]

Houston, Texas, July 17, 1907.

Messrs. Hunt, Myer & Townes,

City.

Gentlemen:

I herewith submit ^{statement} in connection with 292 acres of land, situated about 15 miles southeast of Houston, in Harris County, Texas, and contended for by Mr. J. H. Bute as State school land, under act of State Legislature, appropriating to the school fund, all of the then vacant land. This particular tract of land, prior to the passage of the fore mentioned act, would have been classed as scrap land, or land not disclosed by the land office map, and existing by reason of the irregularities in the boundaries of older and adjoining surveys. As will be seen by reference to the accompanying map this tract is situated between H. T. & B., Sections 1 and 4. Both these sections were placed on the ground, in 1860, by D. Gregg, in his original survey for certificate 5/166, and by him were placed adjacent and adjoining each other. At which time no vacant land existed between the two. It appears that section [#]1. was not patented from the original field notes, made by D. Gregg. But upon a resurvey, made in 1892, which resurvey was made upon an entirely different basis, than the original made by D. Gregg. This resurvey of section [#]1. shifted it south and east of its former position, and created the vacant land upon which Mr. J. H. Bute has placed his file. In order for Mr. Bute to have this land awarded to him by the land office, it will be necessary for him to convince the land commissioner of its existence. And for the purpose of enabling you to present the matter to the commissioner, I will endeavor to acquaint you with the conditions as I find them on the grounds.

The Southern boundary of this tract is readily located, being common with the North line of section 1. Cert. 5/165, and sec. 1., as heretofore stated, was patented upon survey made in 1892. All of its corners consisting earth mound are still visible. Also the bearing calls to the various corners can be verified, in particular I noted that the Ross windmill or the well over which the windmill was placed bears as called for, as do the other natural objects

#2.

coincide with the field notes calls. The western boundary line of the tract, is the east line of the Maddox Bros. & Anderson. This east line of the Maddox Bros. & Anderson survey, as will be seen by reference to the field notes, of sec. 1 cert. 5/165 is common with its west line, which west line of section 1, produced north constitutes the east line of the Maddox Bros. & Anderson survey and the west line of this claim. The north line of the tract is the south line of H. T. & B. sec/4 cert. 5/166, and can be determined only by retracing the work of Gregg done in 1860, at which time he ran out not only sec. 4 but various other tracts in this neighborhood, all of which surveys are tied on to each other, in such a manner as to form a solid and unbroken block, the boundaries of which can be determined by call given in their field notes to the old adjacent surveys, and to such natural points and objects in interior of the block as the field notes call for. In considering the Gregg work as a whole, the various distances given by him, as crossing calls to the Galveston & Houston R. R., offer a positive means of identifying his work. For the purpose of checking these calls, the northwest corner of section 3. cert. 5/270 may be used as a starting point. This point Gregg states, is on the east line of the Callahan and Vince League. From here he ran south and at 650 varas he crossed Berry bayou, and at 700 varas he passed the S. E. cor. Callahan & Vince league and at 1515 varas north, he established the S.W. cor. of sec. 3, a point in R. R. ditch, from which the earthen embankment, an old cattle watering hole, bears S-59-1/4 deg. E. 40 vs. He states that in running S. from this point, he crossed R. R. at 10 vs. and at 1515 vs., established the S. W. corner sec. 4., a point 1185 vs. W. of R. R. Returning again to the S. W. corner Sec/

#3, he ran east 2386 vs., where he placed a charred oak stake, marking the common corner of Sections 1, 2, 3, & 4. He states that from this point, the head of timber on Vince's bayou bears due north. I retraced this work, finding the line in every particular as he called for it. At the common corner of Sections 1, 2, 3, & 4, I find pieces of charred oak, and as this point is in a prairie at least 1-1/2 miles distant from nearest timber, I assume these pieces to be parts of the original stake.

la'

#3.

Some few feet to the south and east of the point arrived at by myself, I find a large cypress post one foot high, showing evidence of great age, as at least two inches of that portion of the stake above ground has rotted off. This stake has been established by some surveyors SE cor Sec. #3., who to have arrived at this point must have retraced Gregg's work.

sec. 3 & 4 a measure cannot due E. of 2386 vs. will give the line of
Having thus established the east line of ^{sec. 3 & 4} secs 1 and 2, the north end of whose line, will be as called for on the south line of the Thos. O. Mux. It is my impression that it was Mr. Gregg's supposition that when he had gone east 2386 ~~tho.~~ that he was on the north prolongation of the east line of H. T. & B. sec. #3. cert. 5/166. However, he was 68 ~~vs.~~ to the ~~West~~ of this line, and owing to the failure of this line to accommodate itself to the ~~West~~ line of sec. 7 & 8, a slight gap would exist.

It becomes necessary next to take up the location of H. T. & B. sec. 3. ^{cert.} 5/166. This survey, made ⁱⁿ 1860 by D. Gregg, was placed upon a ground vacated by two 320 acre surveys, made for Glustus in 1844 by G. H. Bringhurst, situated to the east of and adjoining the F. Martin, also surveyed in 1844 by G. H. Bringhurst. While it is to be presumed that Mr. Gregg in 1860 reproduced the Bringhurst work of 1844, it is not important to our purpose to know that he did, as we are endeavoring only to follow out the Gregg work.

Mr. Gregg tells us that he placed the S. W. cor. of this sec. #1 cert 5/296 on the north line of the F. Martin 640 acre survey. He also tells us that this point is 1201 vs. E. of the R. R. (*See* diff. in calls of sec. #4, 2386-1185).

And in the field notes of the Jno. Gay 1280 acre survey, situated to west of and adjoining the F. Martin, Gregg fixes the Martin N. W. Cor. or Gay N. E. Cor. 531 ~~vs.~~ East of R. R. to which 531 vs. are to be added the easting of the Martin 1560 and the easting of the H. T. & B. sec. #3, of 1560, a total of 3651 vs. that ^{intervene} ~~entrance~~ between the R. R. crossing on S. line of sec. 4 and the N. E. cor. of H. T. & B. sec. #3 or 4836 vs. due east of the S. W. cor. of sec. #4 cert 5/270.

Mr. Gregg more particularly indicates this N. E. cor. of sec. #3 as being 80 vs. north of the S. W. Cor. of sec. #8, from which the head of timber of Vince's bayou bears N 34 deg. W.

4.

thus furnishing a tie between the block of H. T. & B. secs. and the *Washington Co. Secs.*

Sec. #3 calls to run west 1560 vs. to Martin N. E. Cor. thence S. 2316 vs. to Martin's S. E. cor., a point 285 vs. E. of the R. R. (this calls checks), thence E. 1560 to the S. E. Cor. Sec. #3 being also the N. E. Cor. Of the Sutton and the S. W. Cor. Of H. T. & B. sec. #1, cert. 5/165 as same was made by Gregg 1860, this point is also a point on the north line of a survey made by Gregg and afterwards raised. Using this point as the S. W. cor. sec. #1, and running east (following Greggs notes of sec. #1-) 330 vs. places us at an interior cor. sec. #1 being also the N. E. cor. of the Gay survey. This point Gregg tells us is situated 670 vs. E. of R. R. (which call checks) thence from the interior cor. sec. #1 retracing Greggs notes of sec #1 south 810 vs, places us at the point used by Gregg as the beginning or S. W. cor. of sec. #1, a point 12 vs, east of the R. R. and on the Dedrick East line as Gregg understood the same. Reference to the accompanying map shows that all the various calls to the R. R. and to other points between this ending point and the Callihan & Vince S. E. Cor. have been secured and furnish and indisputable chain of evidence as to the Gregg placing of the surveys in question.

Accompanying the field notes of the Day Land and Co. survey of 642 acres, on file in the *General* Land office is a map showing connecting lines by the surveyor, Mr. Booker ^{A.}

This sketch is misleading in ~~several~~ particulars. Mr. ~~Brooke~~ shows the ~~Wm.~~ Vince league as 5,000 vs ⁱⁿ width, whereas the exact width is 4930 vs. He also shows that the S. E. cor. of the Callihan & Vince survey ~~or~~ W. line of Vince league *produced*

south is not common with the W. line of secs. #3 & #4. I can state that the line dividing the Callihan & Vince and the Wm. Vince surveys is ~~and~~ ~~one~~ of no dispute and is today recognized in the precise position as claimed for it ⁱⁿ 1860 by Mr. Gregg. And that the S. E. cor of Callihan and Vince is as Mr. Gregg states 825 vs. north of the R. R. and not as shown in the Booker map, only ^{400 vs.} ~~400 vs.~~ ^{corn's} ~~corn's~~ Mr. Booker's placing of the head of

la³

from following a line between the block of H. L. & B. secs.

5.

timber on Vince's bayou is incorrect, being due north of the line dividing secs. 3 & 4 from 1 & 2, and enables me to map in his D. L. & C. Co 642 acre tract. However, his placing of the head of timber on W. prong of Middle bayou, known as Round Point, is erroneous, being much too far South, being 600 vs south of an eastern prolongation of the N. line of Jno. Gay, 1280 A/ survey. Whereas Gregg defines it as being North 88-1/2 deg. E. of the Gay N. E. Cor.

(Signed)

A. E. Stimpson, SURVEYOR.

file. In order for Mr. Bute to have this land awarded to him by the land office, it will be necessary for me to make a survey of the tract and present the matter to the Commissioner, I will endeavor to acquaint you with the conditions as I find them on the ground.

The Southern boundary of this tract is readily located, being common with the North line of section 2. Cert. 5/185, and sec. 1., as heretofore stated, was patented upon survey made in 1852. All of its corners consisting earth mound are still visible. Also the bearing calls to the section corners can be verified, in particular I noted that the stone monument at the well over which the windmill was placed bears as called for, as do the other natural objects
